

If FM stations were to be replaced by LPFM then I would lose the only radio station I listen to. Airl is a station that only plays positive music that is uplifting and does not play any offensive music. Airl does this while playing a variety of music that is not found on any other station of its kind. If my local community were to lose Airl it would be a major loss. There are not any other stations to replace it and the kind of music it airs. Many people within my community listen to this station and love it. All of my friends who have children are not afraid to let their family listen to Airl because there is not any questionable material on its programs. The public needs to have the choice of not listening to mainstream music and its DJ's. Airl provides the public with this opportunity. To lose it would be a major loss to me, my community and the public.
